## DESCRIPTION

The i700A is the industries most trusted jewelry steam cleaner. The i700A has been designed from the ground up to deliver superior quality steam, and provide the best possible user experience.

The i700A offers a quick, efficient way of cleaning polishing compounds, fingerprints, soap spots and dirt.

**RELIABLE™** understands that the quality of a steam cleaner is only as good (no matter how nice it looks) as what is inside it. This is why we use the best components available; 12-gauge wiring throughout, a ceramic (not plastic) terminal block, Teddington pressure control and an all stainless steel steam tank to eliminate the chance of rust.

## BEST USED FOR

Cleaning all types of compounds, fingerprints, soap spots and dirt

## FEATURES
